SUMMARY

Associate Software Engineer and Full Stack MERN Developer with hands-on experience building scalable and responsive web applications using React.js, TypeScript, Node.js, Express.js, and MongoDB. Experienced in developing REST APIs, authentication systems, responsive user interfaces, database-driven applications, and production deployments. Skilled in AI workflow automation using n8n, API integrations, and automation solutions including Telegram bots and AI-powered workflows. Focused on writing clean, maintainable, and production-ready code.

Education (2021-2025)

- University of Central Punjab (UCP), Lahore (BSCS)
- CGPA 3.63/4.0

Work Experience (3 Years)

❖ Full Stack Developer_____BerryBoost

Lahore | April 2026 – Present

- Developing full-stack web applications using MERN stack and TypeScript.
- Building responsive frontend interfaces with React.js.
- Designing REST APIs using Node.js and Express.js.
- Collaborating with team members to deliver secure web solutions.
- Writing clean, maintainable code with best practices.
- Using GitHub and Postman for version control and API testing.

❖ Full Stack Developer_____Thrive Grit

Lahore | Project Based | December 2025 – March 2026

- Delivered 3 full-stack MERN applications from requirement gathering through to production deployment.
- Built responsive, dynamic frontends using React.js and scalable REST APIs with Node.js and Express.js.
- Managed MongoDB databases and collaborated with the team to ensure clean code, testing, and timely feature releases.

❖ MERN Stack Developer_____Aspire Analytics

Lahore | Internship | September 2025 – November 2025

- Working on full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Building dynamic, responsive frontend interfaces using React.js.
- Collaborating with cross-functional teams to design, develop, test, and deploy features.
